

LABORATORY RECORD

Course: Full Stack Web Development
Course Code: 23CM4121
Experiment No.: 4
Student Name: Pranathi
Roll No.: A24126552071
Date: 08-09-2026

1. TITLE

HTML5 Components and College Information Portal

2. AIM

To design and develop a College Information Portal using HTML5 components such as text formatting, lists, hyperlinks, tables, images, forms, semantic elements, audio, video, and HTML5 input types.

3. OBJECTIVE

- To create a structured webpage using basic HTML elements.
- To demonstrate text formatting using bold, italic, underline, subscript, and superscript.
- To create ordered and unordered lists and hyperlinks.
- To display student information using an HTML table and images.
- To create a student registration form using different form controls.
- To use HTML5 semantic elements, audio, video, and modern input types.

4. THEORY

HTML (HyperText Markup Language) is used to structure content on web pages. HTML5 provides elements for headings, paragraphs, lists, links, tables, forms, multimedia, and semantic page structure. Attributes such as href, src, alt, width, height, type, and target provide additional information and behavior to HTML elements.

Application Flow:

Create HTML document → Add Part A content → Add table and images → Add registration form → Add semantic and multimedia elements → Add HTML5 inputs → Open in browser and verify output.

5. ALGORITHM / PROCEDURE

1. Create an HTML file and add the basic , , , and structure.
2. Create Part A with headings, college information, text formatting, lists, and hyperlinks.
3. Create Part B with the student details table, college logo, and campus image.
4. Create Part C with the student registration form containing text, email, password, radio buttons, checkboxes, dropdown, textarea, submit, and reset controls.
5. Create Part D using header, nav, section, article, audio, video, footer, and HTML5 input types.
6. Save the file and open it in a web browser to verify the displayed components.

6. PROGRAM

index.html

7. CODE EXPLANATION

Code / Syntax	Explanation
<h1>, <h2>	Creates main and secondary headings.
<p>	Defines a paragraph of text.
, <i>, <u>	Apply bold, italic, and underline formatting.
<sub>, <sup>	Displays subscript and superscript text.
, ,	Creates ordered and unordered lists with list items.
	Creates hyperlinks to other web pages.
<table>, <tr>, <th>, <td>	Creates a structured student details table.
	Displays the college logo and campus image.
<form>, <input>	Creates the student registration form and input controls.
<select>, <option>	Creates the branch dropdown list.
<textarea>	Provides a multi-line comments field.
<header>, <nav>, <section>, <article>, <footer>	Provide semantic structure to the webpage.
<audio>, <video>	Embeds multimedia content with browser controls.
type="date/number/color/range"	Demonstrates HTML5 specialized input controls.

8. TEST CASES AND EXECUTION DATA

Test Case	Input / Action	Expected Result	Actual Result	Status
TC-01	Open index.html	College portal heading and Part A content displayed	Page displayed in browser	Pass
TC-02	View Part B	Student table and images displayed	Table and image elements displayed	Pass
TC-03	Use registration form	Form controls accept user input	Controls displayed correctly	Pass
TC-04	View Part D	Semantic sections and navigation displayed	Header, nav, section and article displayed	Pass
TC-05	Open multimedia/input section	Audio, video and HTML5 inputs displayed	Controls displayed according to available files in browser	Pass

9. OUTPUT

Output 1: College Information Portal – Parts A and B

COLLEGE INFORMATION PORTAL	Home Courses Contact
About Our College	Welcome to Anil Neerukonda Institute of Technology and Scinces.
MFML COURSE TOPICS	ML with AI Linear regression MATRICES H^2O x^2
Courses Offered	1. Computer Science 2. Artificial Intelligence 3. Electronics
Facilities	• Library • Computer Lab • Sports
Useful Links	College Website Google
Student Details	Roll No. Name Branch Email
	A24126552071 Badana Pranathi CSE (AI & ML) badanapranathi.24.csm@anits.edu.in
Images	College Logo and College Campus images displayed using img tags.

Output 2: Student Registration Form and HTML5 Input Types

Student Registration Form	Displayed Controls
Name	Text input
Email	Email input
Password	Password input
Gender	Male / Female / Other radio buttons
Hobbies	Reading / Sports / Listening to Music / Dancing / Drawing checkboxes
Branch	Dropdown with CSE, AI & ML, Data Science, ECE, EEE, Mechanical, Civil
Comments	Multi-line textarea
Actions	Submit and Reset buttons
HTML5 Inputs	Email, Date of Birth, Age, Favorite Color, Programming Skill Level

10. RESULT

Thus, the College Information Portal was successfully designed using HTML5 elements. Text formatting, lists, hyperlinks, tables, images, registration form controls, semantic elements, multimedia elements, and HTML5 input types were included and verified in the webpage.
